

COIN CLOUD

Bringing digital currency to all

Whether you know it or not, Digital Currency (ex. Bitcoin) is a market on the rise – and not just for gamers. With \$1.9T cashflow thru 30+ virtual currencies and a user base that's growing exponentially, more companies are buying-in and creating ways to use digital currency day-to-day. From online gaming or investing, to paying bills or sending payments on popular cash applications, the outlets for digital currency are growing. And your shoppers are getting in the game too!

What is Coin Cloud?

Coin Cloud is a small footprint kiosk that empowers consumers to buy, sell or trade digital currency with cash, without the need for a bank account or debit card. As the first DCM (digital currency machine) to market, and only provider in the nation that allows users to both input & withdraw cash (2-way transactions), Coin Cloud makes digital currency easy and accessible to everyone.

Users simply provide identification and input cash, and Coin Cloud guides them through the rest – creating or accessing their digital wallet, digital transactions, withdrawing funds, and customer support. Versus the competition Coin Cloud is the easiest and most convenient option for users, promoting repeat trips.

Retailer Benefits

- Attract New Shoppers:
 - Coin Cloud markets directly to their users, promoting your location for transactions
