

AI-ENABLED VIDEO SURVEILLANCE

VIDEO SURVEILLANCE POWERED BY ARTIFICIAL INTELLIGENCE.

Reduce theft at your store and increase your security with this technologically advanced solution from i3 International Surveillance. Unlike other systems that rely on motion detection, i3 uses its AI-based proprietary algorithm to identify incidences for review when they happen.

HOW IS AI-ENABLED VIDEO SURVEILLANCE EFFECTIVE?

- It can help you quickly identify and respond to an incident without searching hours of video footage
- It reduces the incidence of false alarms that waste resources and desensitize future security events
- It's affordable and has a quick ROI, effectively deterring crime and recouping loss

Video surveillance not only protects your store, but it can also improve your operations. With i3's heat mapping feature, you can quickly detect high-traffic areas of your store. You'll also be able to accurately count shoppers entering and exiting your store and identify peak hours when you might need extra staff and support on hand.

This module-based camera system and software is user-friendly and customizable, with on-site and remote monitoring capabilities. The application can be used on desktop or via mobile.

RETAILER BENEFITS

- Protects your bottom line
- Reduces shrink, internal theft, fraud at checkout, and cash shortages
- Integrates with your POS data to monitor employee performance
- Heat mapping allows you to maximize high-traffic areas for merchandising opportunities

RETAIL TECHNOLOGY

WHY CHOOSE UNFI?

- Leverage UNFI to protect your assets, support shopper engagement, drive sales, and increase your margins
- Get access to UNFI's expert Retail Technology Consultant Team
- Simplified billing via UNFI's automated bill-thru service

AI-ENABLED VIDEO SURVEILLANCE

FEATURES & TECHNICAL SPECIFICATIONS:

- Fast & convenient camera access
- Camera linking through custom facility map
- Live view snapshot
- Text overlay display with option to hide/unhide
- Picture-in-picture digital zoom
- Digital PTZ feature support for Annexus 360° camera models
- Auto playback, control/sensor, iSearch and iThumbnail support
- Servers can be sorted into Groups for convenience
- Automatic substream display on low bandwidth networks
- Batch login information update for remote connections
- AVI/MP4/i3Encrypted video backup
- Multi-channel backup
- Up to 4 separate instances of VPC can be opened simultaneously
- Automatic updates support
- Compatible with Windows Vista, Windows 7, Windows 8 or Windows 10
- Alert Centre support (purchased separately)
- Video command support (for third party integrations)
