

24/7 REFRIGERATION MONITORING

Real-time Temperature Monitoring

Commercial refrigerators and freezers are the workhorses of the modern grocery store. With proper maintenance, your refrigerator and freezer equipment can outlast their average lifespans—but older models may have trouble keeping their temperatures consistent. With Guardian from LogSafe Compliance, you'll get peace-of-mind that your refrigerators and freezers are operating at their optimum temperatures for food safety and asset protection.

Guardian's cutting edge-sensor technology and proprietary software **constantly monitors the temperature of refrigerated cases and walk-in coolers and freezers** and immediately alerts you when there's a problem. Alerts will include data to help you decide whether emergency service is required or if repairs can wait until regular business hours.

Real-time monitoring keeps your products safe, prevents loss, and reduces costly equipment repairs by keeping you in-the-know before small issues turn into catastrophic ones. Data can also help you decide whether it's time to repair or replace existing units.

RETAILER BENEFITS:

- Extends lifespan of refrigerator & freezer units
- Immediate notifications alert management to issues
- Data accessible 24/7 from any mobile device
- Intuitive, easy-to-understand interface
- Online tools for offsite equipment triage
- Customizable coverage depending on your needs
- Low installation cost and monthly fees

Level up your food-safety protection by combining Guardian with LogSafe's suite of automated food safety applications including hot- and cold-food temperature monitoring, slicer sanitation, and illness-logging solutions. Together with Guardian, LogSafe's automation tools helps grocery retailers stay compliant with FSMA requirements while improving overall food safety and quality.
